STACY WYATT

Houston, TX | (832) 264-3203 | stacymwyatt@gmail.com | LinkedIn Profile

BOARD MEMBER CANDIDATE

- **Influential and accomplished executive with expansive career experience** driving strategic testing and automated validation for secure, high-performance financial systems. Demonstrates expertise in bridging product management and engineering to deliver secure, scalable software solutions. Deep experience in technology and product portfolio governance, software engineering lifecycle (SDLC) oversight, cloud architecture, and enterprise architecture integration. Strong leadership in strategic planning, continuous improvement, and technical execution across complex enterprise environments. Accelerates digital transformation by transitioning slow, manual processes into high-reliability, automated ecosystems, leveraging Agile/DevOps delivery models and data-driven decision making to deliver speed without compromise. Experienced in quality engineering governance, cybersecurity, and regulatory compliance, cost optimization, and engineering performance metrics (reliability and throughput).
- **Leads, scales, and empowers top-performing** teams through collaborative leadership, management oversight, and stakeholder engagement; promotes a culture of professional growth, inclusivity, trust, high morale, and performance excellence. Recognized for executive governance across product, engineering, and business stakeholders, ensuring alignment of strategy, delivery, and operational execution. Strong communicator with proven ability to engage at all levels, including senior leadership and cross-functional governance forums. Maintains a strong focus on strategic thinking, stakeholder alignment, and organizational effectiveness, supported by solid educational credentials and ongoing professional development in technology leadership and transformation disciplines.
- **Adds a fresh mindset and perspective to the mix.** Navigates complexity and challenges with confidence. A respected leader and positive presence. Thrives in high-growth engineering environments with evolving priorities. Recognized for strong work ethic, technical agility, analytical mindset, and forward-facing vision, with a strong emphasis on continuous improvement, operational transformation, and workflow optimization across enterprise-scale environments. Demonstrates a governance-oriented leadership style grounded in accountability, transparency, and results-driven execution across complex, regulated, and fast-moving technology organizations.

CORE SKILLS AND COMPETENCIES

- Technology & Product Portfolio Governance
- Product Strategy & Lifecycle Management
- Software Engineering & SDLC Fluency
- Agile/DevOps/CI-CD Delivery Models
- Quality Engineering & Reliability Governance
- Cloud Architecture & Platform Strategy (AWS/Azure/GCP)
- Enterprise Architecture & Systems Integration
- Cybersecurity, Risk & Regulatory Compliance
- Product Analytics & Data-Driven Decision Making
- Engineering Performance & Delivery Metrics
- Technology Cost Optimization
- Continuous Improvement & Operational Excellence
- Operational Transformation & Workflow Optimization
- Cross-Functional Executive Governance & Stakeholder Alignment

SELECTED CAREER ACHIEVEMENTS

- Built and scaled multiple departments from the ground up, identifying high-potential talent and designing onboarding processes; worked with team members to create personalized development plans and help them reach their career goals.
- Transformed a 4-person manual QA team into a 25+ member automation-focused unit (SDETs and Managers). Spearheaded hiring for automation expertise and developed internal talent into SDET Manager roles. Managed a diverse team ranging from Junior to staff SDETs.
- Sustained a high-velocity "Release When Ready" model during rapid organizational growth by centralizing QA oversight in the PR process and ensuring continuous delivery without compromising system stability or code quality.
- Implemented a streamlined environment strategy by consolidating to a single staging environment for production deployment, while establishing dedicated team-level testing environments for both manual and automated validation, along with easily deployable and disposable local testing setups, ensuring thorough, reliable testing without slowing a fast-paced release cadence.
- Led a comprehensive effort to stabilize the automation framework by systematically identifying and resolving flaky tests through rigorous validation and refinement processes, while also driving the expansion of a robust, multi-layered testing strategy, including UI, integration, API, and end-to-end testing.

PROFESSIONAL EXPERIENCE

BEYOND FINANCE | Houston, TX **2020 to Present**

Director of Quality Assurance

Championed fintech QA operations; integrated data analytics with service quality to ensure product excellence. Launched scalable QA frameworks to optimize operational performance.

- Scaled capacity fivefold, building a 25+ person department with a dedicated SDET management layer (5 managers) supporting 6 integrated product teams.
- Orchestrated transition from manual to automated testing, ensuring timely and consistent tests, and significantly expanded coverage, from 0 to 100%, across E2E, regression, and performance benchmarks in six months.
- Optimized the Mobile QA workflow; replaced Waterfall processes with Agile methodologies and shifted automation to align with development sprints in Linear, to achieve efficiency gains, going from a twice-per-month release to weekly.
- Spearheaded a "Release When Ready" strategy to enable seamless daily updates without affecting platform stability, deploying to production multiple times daily across a complex ecosystem of Ruby/RSpec backends, Salesforce internal tools, and React Native mobile apps.
- Established a quality-centered culture by empowering QA to own PR merges and execute automation in partnership with the development team.
- Accelerated software delivery, from one hour to under 20 minutes, by modernizing the tech stack and tools and eliminating key bottlenecks between engineering and deployment.
- Managed strategic vendor relationships and enterprise accounts for Postman and Sauce Labs, ensuring alignment with QA automation, API testing, and mobile testing infrastructure needs while optimizing tool utilization and platform performance.
- **Testing Frameworks**: RSpec (Backend/Ruby), Capybara (UI/Web), Appium (Mobile/React Native), Postman (API Testing), DBeaver (Database Testing & Validation).
- **Infrastructure & Cloud**: SauceLabs (Mobile Distribution), CircleCI (CI/CD Pipelines), GitHub (Version Control).
- **Platforms & Domains**: Web/Dashboard/Mobile (Customer-Facing), Accredited Debt Relief (Marketing/Lead Gen).
- **Project Management**: Trello (Agile/Sprint Management), Notion (Knowledge Management), Jira, Atlassian, Linear.
- **Delivery Model**: Continuous Integration/Continuous Deployment (CI/CD), Release When Ready (Multi-release daily cadence).
- **UI/Diagramming**: Miro, Lucid Chart, Figma, Percy.

cPANEL | Houston, TX **2012 to 2020**

QA Manager

Amplified platform reliability by leading the QA team to establish rigorous, proactive testing frameworks and successfully closing the gap between development speed and client expectations.

- Commanded scrum methodologies as Product Owner for a tactical team of 4; streamlined sprint planning to ensure on-time delivery of product roadmaps.
- Developed and optimized automated testing suites using Selenium and Perl and captured a reduction in execution time by automating 70% of the process, leading to a significant decrease in tech support tickets at launch.
- Designed and executed comprehensive test suites, utilizing exploratory, boundary, and black-box methodologies, and identified critical defects before production while improving overall software stability.
- Directed financial planning for the department; aligned hiring budgets with long-term product roadmaps and delivered consistent fiscal results.

EARLY CAREER

LONE STAR COLLEGE | *Adjunct Professor of English*

- Instructed students in writing, grammar, and literature, with a focus on analysis and application of editing and revision techniques. Developed engaging lessons to promote student involvement and application of course material.

KEY ORGANIZATION SYSTEM | *Online Blogger*

- Published blog posts that provided readers with actionable guidance on organization strategies, time management techniques, and practical philosophical approaches to decluttering and simplifying their home, office, and personal life.

EDUCATION

TEXAS A&M UNIVERSITY – CORPUS CHRISTI | Master of Arts (M.A.) – English

TEXAS STATE UNIVERSITY | Bachelor of Arts (B.A.) – English

TRAINING

SCRUM ALLIANCE | Scrum Master Certified (SMC), Scrum Product Owner Certified (SPOC) & Advanced Certified Scrum Product Owner (ACSPO)

INTERNATIONAL SOFTWARE TESTING QUALIFICATIONS BOARD (ISTQB®) | Advanced Level Test Analyst (CTAL), Agile Tester (CTFL-AT) & ITIL Foundation Level

SPEAKING ENGAGEMENTS

HIGHWAY CONFERENCE (2022) | QA CONFERENCE
