Cross-Functional Collaboration

EDUCATION

Master of Arts (M.A.) – English

TEXAS A&M UNIVERSITY

Bachelor of Arts (B.A.) – English

TEXAS STATE UNIVERSITY

Executive Biography

Stacy is an accomplished and forward-thinking executive known for driving strategic testing and automated validation across secure, high-performance financial systems. With a unique ability to bridge product management and engineering, she delivers scalable, customer-centric solutions while accelerating digital transformation through the modernization of manual processes into highly reliable, automated ecosystems. A respected leader, Stacy builds and empowers high-performing teams, fostering a culture of trust, inclusivity, and continuous improvement. Recognized for her technical agility, analytical mindset, and ability to navigate complexity with confidence, she brings a fresh, resilient perspective to solving critical business challenges in fast-evolving environments.

Stacy's career reflects a steady evolution from hands-on quality assurance leadership into a transformational force within high-growth fintech environments. She began by strengthening foundational testing practices and driving early automation efforts, quickly distinguishing herself through her ability to align quality engineering with product delivery timelines. She progressed into leadership roles where she not only optimized testing frameworks but also influenced product roadmaps, operational planning, and cross-functional execution, bridging gaps between engineering, product, and business priorities to deliver more reliable, scalable software.

In her current role, Stacy has become a catalyst for enterprise-wide change, building and scaling high-performing QA organizations while redefining how quality is embedded into the software development lifecycle. She has led the transition from manual to fully automated testing ecosystems, enabling continuous delivery at scale and significantly accelerating release cycles without compromising system integrity. Known for cultivating strong teams and modernizing legacy processes, Stacy continues to shape resilient, high-velocity engineering environments that support innovation, stability, and sustained business growth.

Stacy holds a Master of Arts in English from Texas A&M University–Corpus Christi and a Bachelor of Arts in English from Texas State University, complementing her technical leadership with strong communication and analytical foundations. She is extensively certified in Agile and quality disciplines through Scrum Alliance and the International Software Testing Qualifications Board, including advanced credentials in Scrum product ownership and test analysis. Stacy is also an active contributor to the industry, sharing her expertise as a speaker at the Highway Conference 2022, where she engages with peers on evolving trends in quality engineering and software delivery.
